Country-level Claude usage: raw and income-adjusted associations

Figure D1 | Corrected 2025 IH, GNI and AEI sample | n = 36

Gold marks Bulgaria after the EUR-to-BGN wage-unit correction. Navy lines show descriptive OLS fits.

AEI includes Free and Pro conversations relative to the working-age population; it is not paid-plan adoption.

This check does not identify causal price effects or affordability among minimum-wage workers.
